HERITAGE
Bonnell Coil

Rest Assured
comfort for life

FACT

BENEFIT

Plush BREATHEABLE sides

Luxurious moisture dispensing Hyper Soft BLUE BEAD polyurethane layers offer a comfortable yet supportive plush top and bottom layer.

Dual Tempered Bonnell

The Bonnell spring units are both heat and electronically tempered for more rigidity and to ensure a minimal compression set.

Active Technology

The springs are hand packed with the knots facing each other to eliminate any tilt on the spring unit.

Pre Set

The Bonnell unit is compressed flat to eliminate initial sagging in a mattress.

6 Turn Bonnell

A six turn BONNELL has 33% more working wire than a five turn spring.

Double Knot

The Bonnell springs are knotted at the top and bottom to avoid knot slipping.

Open cell technology

Polyurethane Foams are manufactured with an open cell structure which allows for ventilation ensuring an ultra hygienic sleep environment.

Knitted Ticking

The soft touch jacquard ticking is micro-quilted to ensure optimum heat dissipation.

Hygienic & Non Toxic

All foams used in the manufacturing process are produced in-house at Strandfoam Group and is completely stable, non-toxic and Hygienic.

Dual Sided

The MQ10 offers the benefit of dual sleeping surfaces for prolonged comfort and support.
